## Superior General Air Filtration

Our most popular general purpose air purifier, this unit treats all the various types of pollutants which contribute to poor indoor air quality. It features AllerAir's standard size 2.5 inch deep activated carbon filter to adsorb chemicals, gases and odors and a medical-grade HEPA filter to remove 99.97% of all airborne particles down to 0.3 microns. This unit (without UV) is ARB certified for sale in California.

### Why AllerAir Air Purifiers

Backed by unparalleled expertise in air quality control and a superior filtration system, AllerAir air cleaners are individually customized to target the airborne pollutants of concern in the environment. Our units offer more filtration media than any other manufacturer, with the deepest carbon bed filters for chemicals, gases and odors, and superior medical-grade HEPA filters for particle control.

### Cleaner Indoor Air

Clean air is recognized as a vital component for overall comfort, workplace health and safety as well as productivity. According to research from leading organizations like the EPA, WHO and Health Canada, indoor air pollution may pose more of a public health risk in North America than outdoor air pollution.
