

DG-6 Disposable Protective Coverall

Protective coveralls protect the skin from the harmful effects of liquid or solid chemicals. Peace of mind is important when protecting against blood and chemical jet sprays. Features like taped seams and secure fitting thumb loops help to give you confidence when facing chemical hazards.

Working all day in a coverall can get uncomfortable, and finding the right level of protection while balancing the need for comfort is not easy. Fortunately, we have a solution. Our protective disposable coveralls can help protect workers against hazardous particles, limited liquid splashes, sprays, and even jet sprays while providing comfort leading to increased productivity.
