

HC-1 Bouffant Cap

Our disposable hair caps for workers are lightweight and comfortable to wear, they are inexpensive, simple to use and provide effective protection against product contamination. Bouffant caps also keep an individual's hair out of their eyes when working and this increases productivity.

Bouffant caps differ from hair nets. Hair nets are made of nylon or polyester mesh material and are designed to stretch over the head and mat down the hair, but this will produce a webbing effect. The webbing has openings or apertures which could inadvertently allow hair to pass through, whereas a bouffant cap is made from a layer of fabric free from apertures.
