

## MG-3 Latex Gloves

Latex gloves are from natural materials, made out of rubber. They are a popular choice of protective glove and are widely used many industries including in food service, food processing, automotive, and manufacturing.

Our latex gloves are extremely resistant to tearing, ripping or puncturing. This is partly due to their tight and clean fit against the hands and fingers, leaving no loose material which may be caught against sharp instruments or objects. Their elasticity makes them comfortable to wear even for long durations.

## Latex Glove Features:

- Protection from unwanted or dangerous substances
- Easy donning and tight fit prevent rollback
- Softness provides superior comfort and natural fit
- Has a high level of touch sensitivity
- Beaded cuff makes donning easy
- Ambidextrous and straight fingers
- Latex naturally offers chemical resistance

## Product Description:

- Designed with heavy-duty natural latex rubber and offers amazing tactile sensitivity for fine equipment handling
- Durable and tear-resistant – features a natural latex build that allows for heavy-duty use without fear of puncturing or tearing.
