

MG-D235 Diamond 3.5 Mil Nitrile Examination Gloves

Our 3.5 mil Diamond Advance nitrile examination gloves are quickly becoming the material of choice for clinics and hospitals. The main reason is unlike latex, nitrile has a lower allergy rate than latex gloves.

Our nitrile gloves provide exceptional puncture and chemical resistance. The examination gloves are highly puncture resistant, up to 3 to 5 times more resistant than latex.

The 3.5 mil Diamond Advance nitrile examination gloves are used in various applications, including industrial, and food industries, healthcare, and hospitals.
