

## MG-D23F Diamond Fentanyl Resistant Nitrile Gloves

Our Diamond nitrile fentanyl-resistant examination gloves are quickly becoming the material of choice for clinics and hospitals. With 100mcg/2mL Fentanyl Citrate Injection tests, there is no breakthrough for up to 240 minutes. There is slight swelling but no degradation.

These nitrile gloves provide exceptional puncture & chemical resistance. They are up to 3 to 5 times more resistant than latex, and cause no allergies the way latex does.

These nitrile fentanyl-resistant examination gloves are designed to be disposable gloves intended for medical purposes where there is risk of contamination between patient and examiner.

Price	
1-9	\$56.00/case
