

## MG-D355 Diamond Advance Latex Examination Gloves

The Diamond Advance latex examination glove provides a high level of protection when working directly with bodily fluids in a laboratory setting, and provide greater resistance to blood borne pathogens as well. Our gloves are designed to provide maximum flexibility and comfort. They are not restrictive or constricting, even when worn for long durations.

These gloves are used in a wide range of industries such as medical, home care, general cleaning and janitorial, IT, food service, cosmetics, and salon applications.

These gloves offer great tactile sensitivity while remaining extremely durable. This allows the wearer to perform delicate, precise, and rigorous tasks without fear of punctures.
