

MG-D5 Diamond High Density Polyethylene Gloves

Disposable polyethylene gloves are designed for food services and light duty tasks. These gloves are a great way to ensure your kitchen staff is practicing proper food safety procedures. The non-sterile powder-free poly material is easy to slip on and off and the comfortable fit will not get in the way of your tasks.

Our gloves are an inexpensive and disposable option for maintaining a hygienic environment. Each pair is perfect for light-duty tasks that require frequent glove changes, like in food service lines, deli counters, and at home. They are also an extremely cost-effective option for use in poultry processing, food preparation, restaurant service lines, and other areas where safety is a priority.
