

PG-1 Face Shield for Kids

Face shields are a good option for kids because they cover the entire face and make it harder for young people to touch or scratch their nose, mouth, and eyes. Also, if your child wears glasses, a face shield will eliminate the annoying fogging from masks and make it a bit easier to breathe.

The face shields are very easy to clean and can be wiped down with alcohol after each use. While shields are not meant to be a complete substitute for cloth face coverings, they're a very helpful addition to your preventative measures - especially if you're having a particularly tough time getting your child to stop touching his or her face while in public.
