

## PG-3 Safety Goggles

Safety goggles are important for a number of reasons. They allow the wearer to handle potentially harmful chemicals without fear of damaging their eyes. Safety goggles help to protect an individual from harm to the eye from physical trauma especially in factory and industrial settings.

Our safety goggles are a dependable and an economical choice that offer a sturdy polycarbonate lens, adjustable elastic strap and a wide opening to fit over most prescription eyewear. It is built with anti-fog lens and direct venting system to give you crystal clear vision all the time, allowing for use in varied environments and conditions.
