

PG-4 Protective Glasses

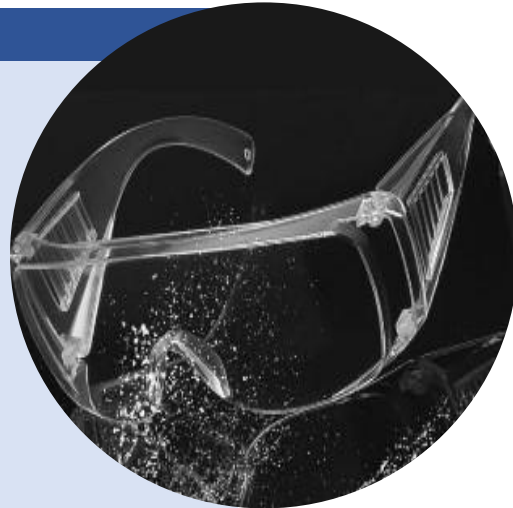

Protective glasses are one of the best defenses against eye injuries. They protect your eyes from a myriad of potential hazards at work, home, and outdoors. In addition, wearing safety eyewear can have a significant impact on overall, long-term eye health.

VizoCare's protective glasses are a part of our Personal Protective Equipment for eye protection. They act as a shield to protect the eyes from any type of foreign debris that may cause irritation or injury. Experts say proper protective eyewear could prevent up to 90 percent of all eye injuries, and our protective glasses are intended to shield the wearer's eyes from impact hazards such as flying fragments, objects, large chips, and particles.

Protective Glasses Features:

- Stylish Design - It is very lightweight and comfortable to wear.
- Wide Application - Carpentry, metal and construction work, shooting, cycling, racquetball, or anywhere where you need to wear PPE eyewear.
