FURO® SOAKING TUBS
WATER. HEALING, THERAPEUTIC, RESTORATIVE WATER.
Water. It’s always been about the water.

For thousands of years, the Japanese have used the therapeutic quality of water. Healing. Rejuvenating. Cleansing.

Water, at high temperatures, has the ability to affect our bodies to the core — improving the way the body functions and combating the harm done from the world around us. Cold water immersion, used world wide by world-class athletes, relieves pain and stress and stimulates various functions of the body.

FuroHealth uses advanced technology to bring this old-world therapy to you. You will benefit from the timeless healing quality of a traditional soaking tub while experiencing an easy-to-care-for tub with the best available filtration and purification system available. A soaking tub which remains crystal clean, chemical free and ready to use when you are. No wasting of water. No chemicals on your skin. No time-consuming preparation.

Once you understand the healing qualities of high-temperature soaking, you will benefit from this timeless ritual just as so many have for thousands of years.

Here’s to your health.
What is a FUROHEALTH® soaking tub?

FUROHEALTH® has taken the best of the modern hot tub and mated it with the 3000 year-old ritual that has taken place all over the world – still water soaking. The FUROHEALTH® soaking tub is a Japanese-style soaking tub which you do not have to drain and refill for each use. Filtration and purification keep the tub absolutely clean with almost no chemicals at all – reducing the use of precious water.

A FUROHEALTH soaking tub is NOT a conventional hot tub with jets and bubbles. A soaking tub typically runs 10 to 15 degrees hotter than a conventional tub. At those temperatures, friction from water circulation is too hot on the skin. Instead, you receive the therapeutic healing benefits from water at higher temperatures, reaching deep into the core of the body.

Our soaking tubs fit conveniently in smaller spaces – in the home or outdoors – and plugs into a 110 volt, GFCI dedicated electrical outlet. No plumbing necessary. Once filled, the water temperature and purity are maintained so it is always ready to use when you are. All with an energy cost of only a few cents a day.

Why we soak.

Hot water soaking has the combined benefits of increasing body temperature and relieving gravity’s pull on the skeleton and tissues. Body temperature and heart rate gradually rise, but without causing a rise in blood pressure because blood vessels dilate with the heat. As a result, blood delivery improves, bringing in nutrients and oxygen and taking away toxins from areas that may otherwise suffer sluggish flow. The body then sweats and removes those toxins and chemical wastes through the skin.

Increasing your core temperature temporarily helps your body fight virus and other impurities in the blood. It also speeds healing from injuries, improves arthritis symptoms, helps those who have restricted mobility, reduces the need for pain medication, loosens muscles before a workout or soothes them afterward, and improves sleep.

In addition to the physical health benefits, the mental benefit are undeniable. Stress is the major contributor to so many ailments today. A hot soak can relax the body and calm the mind, allowing the body’s natural healing process to occur. And a cold plunge can invigorate and prepare oneself for challenges ahead.
FURO® Hot Soaking Tub

All FUROHEALTH® Hot Soaking Tubs are constructed with a proprietary design – a single-piece maintenance-free inner tub, energy-efficient and technically advanced filtration and purification, and an exterior which is durable, water resistant, and nearly indestructible. Our tubs are made to be portable, or you can find just the right place to suit your personal needs and intended use. We also offer a tub without the exterior black finish that your contractor can build in for a unique home design.

Provides plenty of room to stretch out. Suitable for one or two people.

**Exterior Dimensions**  64.50 long X 33.75 wide X 34 high  
**Interior Dimensions**  48 long X 24 wide X 30 high  
**Empty Weight**  175 lbs.  
**Weight 2/3 full**  970 lbs.

**Top Frame Choice** (comes with coordinating cover)

**Exterior Finish**
Your Furo Hot Soaking Tub will be wrapped in a protective coating that is tough and durable. It is protected from the harshest of elements. It’s water tight, worry free and low maintenance. The polyethylene coating is UV stable and scuff resistant. This tub is nearly indestructible.
HYOGA® Cold Plunge Tub

Hyoga® Cold Plunge Tubs, like the FuroHealth® Hot Soaking Tubs, are designed with advanced technologies to provide energy and water efficiency as well as convenience of use. Tubs are suitable for indoor or outdoor use. Perfect for combining with existing tubs, showers, saunas or add to your private fitness room. Choose to combine a hot soaking tub with a cold plunge tub for the ultimate water therapy experience.

Comfortably sized while remaining very compact in overall footprint. Fits one person comfortably.

**Exterior Dimensions**  61.50 long X 33 wide X 33.75 high  
**Interior Dimensions**  36 long X 24 wide X 30 high  
**Empty Weight**  175 lbs.  
**Weight 2/3 full**  725 lbs.
