GloveNation

GLOVE SIZE INDICATOR CHART

Our disposable gloves can be used in a variety of **jansan**, **foodservice** or **medical applications**. They provide added protection to users and help maintain sterile environments. Whether needing hybrid, latex, nitrile, poly, synthetic or vinyl, we have a **range of sizes** available in colorful, easy to read packaging.

Simply place the widest portion of your hand over the size indicator chart to find the glove size that is ideal for you

Don't settle for anything less than stellar quality gloves

Latex gloves are **form-fitting**, **puncture resistant** and **tear resistant**, making them a great option for completing medium-duty tasks. GloveNation has a variety of latex gloves available for industrial, medical, and food service uses. Available both **powder-free** for use in medical environments or **lightly-powdered** for easy donning, latex gloves are not safe for use by users with latex allergies or sensitivities.

Looking for an extra thick glove? Use **Response ER** gloves. **Neptune** gloves are the best household glove option for dish washing and other cleaning tasks.

Perfect for everything from cleaning to foodservice tasks, our selection of latex gloves are up to any task.

GloveNation's vinyl gloves provide a quality fit and design without the hefty cost to keep medical, industrial, and food service locations running smoothly and safely

Vinyl gloves feature a more **durable** design than poly gloves, and are a great latex-free option to help prevent allergies or sensitivities. **Cost-effective**, they are designed for **quick tasks** and allow for the easy removal and replacement of gloves in busy medical, food service, or industrial locations. Featuring a more **form fitting** design, they have beaded cuffs and are made from polyvinyl chloride (PVC) which is a thermoplastic polymer.

Stretchier vinyl gloves with a higher tensile **strength** are generally classified as **synthetic** gloves. Similar to regular vinyl gloves, they are a great alternative to latex.

Resistance to Common Chemicals

Animal Fats and Poultry: poor
Fish (Shellfish): fair
Vegetable Oil: fair
Bleach: excellent
Household Detergents: good
Brake Fluid: fair
Diesel Fluid: poor
Gasoline: fair

Our C2 Hybrid Gloves are made of thick LDPE

They are 100% latex, PVC, phthalate, carcinogen, and cornstarch free, making them ideally suited for people with latex sensitivities or allergies.

These gloves are constructed from **100% recyclable materials**, have 90% less harmful emissions during the manufacturing process, can be recycled with plastic bag recycling and takes up to 62% less space in our landfills than traditional gloves.

C2 Hybrid synthetic gloves are ergonomically designed for an **enhanced fit** and glide on easily, even with wet hands. Their diamond sure **grip texture** makes for a better, secure grip. All C2 Hybrid gloves are FDA approved for food contact.
