

I-400-1 Combo Water/Air Spray Gun

V-C-125-WRK
Replacement O-Ring Kit
Not Shown

I-400-1 Combines air to the water for extra force for any type of cleaning. I-400-1 is better than a pressure washer it lets you regulate the air pressure by turning the control handle so you have more control, less expensive, conserves water and takes little space to store.

Directions

1. Connect one end of the 1/4" air hose to T-6821 hose barb securely
2. Connect other end of the 1/4" air hose to air compressor. **Do not exceed 125 PSI**
3. Connect water hose to bottom of F-C-125-N Water Gun Spray Body
4. Turn water source on
5. Nozzle is reversible gives you a fan spray on one side other side gives you a full flow. Full flow is suggested.
6. Pull BB-105 Trigger Handle to start water flow and release to stop
7. Turn T-6829 Control Handle counter clockwise to desired pressure needed
8. After done using turn T-6820 petcock handle clockwise to off
9. Turn water source off to the spray gun
