

History Through the Ages: Suggested Placement Guide Scope and Sequence

The Suggested Placement Guide is a supplemental product designed to go along with the *History Through the Ages Timeline Figures* and the “*Record of Time*”, a printable timeline notebook. The *Suggested Placement Guide* provides a guide on the best place to put each timeline figure in the *Record of Time* notebook. The purpose of creating a timeline is to visually reinforce where in history a person lived or an event took place. As a student studies each important person or event (from ancient, world, Biblical, American history, etc.) they add the corresponding figure to the timeline, creating a continuous flowing picture of events. Students also see who was alive at the same time at any given moment throughout the world, making connections that may be difficult to do as the history of different geographic areas and people are studied from one year to the next.
