MIXING RATIOS

Solid Pearls Element Pearls	50g per sprayable gallon
Candy Concentrate	20g per sprayable gallon. Powder must be dissolved in reducer ONLY first.
Ultra Interference Interference Pearls Crystal & Crystal X	50g per sprayable gallon over white base 25g per sprayable gallon over black base
SuperShift Pearls®	25g per sprayable gallon
SuperShift Flakes®	10g per sprayable gallon
ColorShift Pearls ✦✦ White Particle ColorShifts	75g per sprayable gallon 50g per sprayable gallon
Holographic Pearl v2	Black base will produce the strongest effect. 10g-15g per sprayable gallon at 2-3 coats. Dark gray base effect is stronger than a silver base but smoother than a black. 10g-15g per sprayable gallon at 2-3 coats. Silver/Light gray base will produce a smooth silver holographic effect. 20g per sprayable gallon at 2-3 coats. Can use up to 25g per gallon, however applying too much pearl will result in a subtler effect.
