Many customers are replacing their old toxic lead acid batteries with new more powerful safer Lithium (LiFePO4) Batteries for their mobility scooters.

The reason is that Lithium batteries offer tremendous advantages including higher capacity, faster charge times, long cycle life, and lower weight. These benefits are important for mobility scooters because it allows the motor to run at peak performance for a longer period of time per charge and with none of the safety and maintenance issues with lead acid batteries.

We offer a variety of 12V - 24V and more LiFePO4 batteries for your mobility scooter motor with several models <300Wh. Aegis Battery offers superior quality 18650 LiFePO4 battery packs at affordable prices and backed by our 10 year warranty with USA support & service.
