

SIZING CHART INSTRUCTIONS: In general, Skooties can be sized based a skater's boot size and wheel diameter. The stretch factor will allow a Skootie to cover multiple wheel sizes within one boot size. Most common wheel sizes are highlighted for reference. Boot sizing is based off of Riedell boots.

If a skater uses a boot from a manufacturer other than Riedell, please refer to the instructions of the bottom of this chart for measurements based on PLATE SIZE. If a skater is on an overlap size, we recommend going with the smaller size Skootie for maximum grip.

Small Skooties Riedell boots size 3-5.5		
Wheel (mm)	Min Wheel Base (mm)	Max Wheel Base (mm)
48	153	173
52	143	163
54	138	158
55	135.5	155.5
56	133	153
57	130.5	150.5
58	128	148
59	126	146
62	120	140
63	118	138
65	114	134
67	110	130
70	104	124

Medium Skooties Riedell Boots size 6-8.5		
Wheel (mm)	Min Wheel Base (mm)	Max Wheel Base (mm)
48	173	193
52	163	183
54	158	178
55	155.5	175.5
56	153	173
57	150.5	170.5
58	148	168
59	146	166
62	140	160
63	138	158
65	134	154
67	130	150
70	124	144

Large Skooties Riedell Boots size 9-13		
Wheel (mm)	Min Wheel Base (mm)	Max Wheel Base (mm)
48	193	223
52	183	213
54	178	208
55	175.5	205.5
56	173	203
57	170.5	200.5
58	168	198
59	166	196
62	160	190
63	158	188
65	154	184
67	150	180
70	144	174

Instructions for SKATE PLATE Sizing: Skooties can be sized based on a plate's wheel base distance in relationship to the skater's wheel diameter. To size a Skootie by SKATE PLATE, first find the wheel diameter (the first column), then the wheel base measurement within the min and max wheel base (second + third columns). Wheel base distances can be referenced using sizing charts from the plate manufacturer.
