(total compensation \$45,000)

Just fill in your information online at reliefband.com/travelagent and we will reach out to you with more information about the program.

*Based on the sale of a 2.0

Travel with Confidence

Motion Sickness

Nothing Spoils Your Day Quite Like Motion Sickness

About one-third of the population is highly susceptible to motion sickness.¹ Motion Sickness occurs when the brain receives conflicting information during motion,^{2,3} - from the inner ear and the eyes. In other words, your eyes and body are sensing different levels of motion.

Symptoms of motion sickness generally consist of dizziness, fatigue, malaise and nausea, which may progress to retching and vomiting. If left untreated, symptoms can linger for hours or days. Reliefband® puts your clients in the driver's seat with the ability to quickly control nausea and vomiting without drugs.

Life Changing Relief From Nausea And Vomiting Without Drugs

How Reliefband Works

1

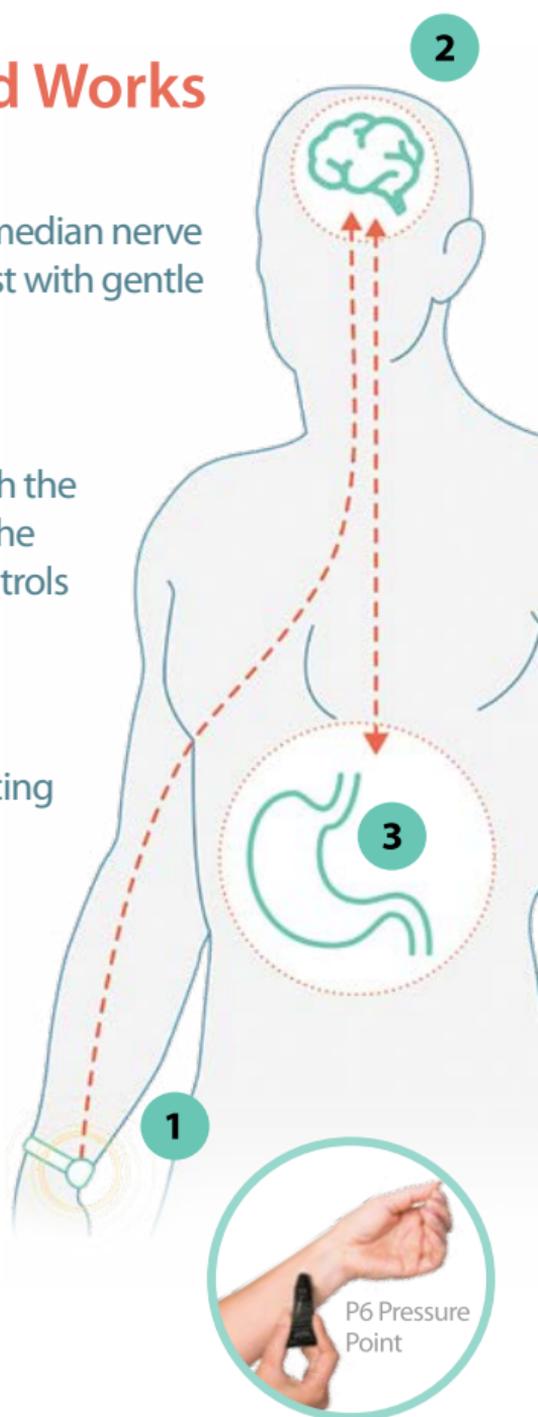

Reliefband stimulates the median nerve at the underside of the wrist with gentle pulses.⁴

2

These signals travel through the body's nervous system to the part of the brain which controls nausea and vomiting.

3

The signals have a rebalancing effect, normalizing nerve messages from the brain to the stomach relieving symptoms of nausea and vomiting.^{5,6}

Hypo-allergenic Reliefband Gel ensures fast and effective relief
