build instructions for: Butterfly

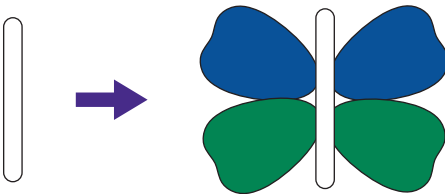

colors needed:

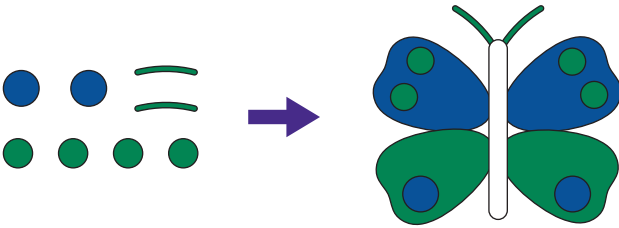

- 1 To make the wings of the butterfly, roll out two blue pieces of dough in the shape shown below. Do the same with the green dough. Arrange in the pattern of butterfly wings.

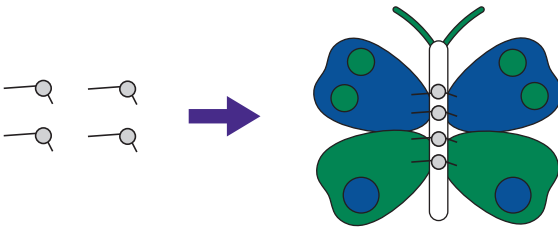

- 2 Roll out a long piece of white dough for the body. Attach the body to the center of the butterfly's wings.

- 3 Create the butterfly's dots and antennas and attach to the body and wings of the butterfly.

- 4 Next, attach the long legs of LEDs into the left side of the butterfly's wings, with the smaller legs going into the right side.

- 5 Insert the red wire into the left green wing of the butterfly and insert the black wire into the blue wing of the butterfly. Next, turn on the battery holder to see your butterfly light up!
