

squishy circuits®

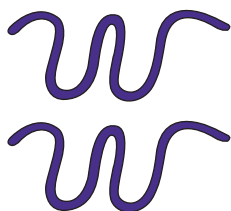

build instructions for:

Circuit

colors needed:

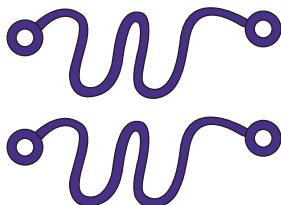

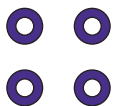

- 1 Roll out two long strips of purple dough and form each into a "W" shaped squiggle.

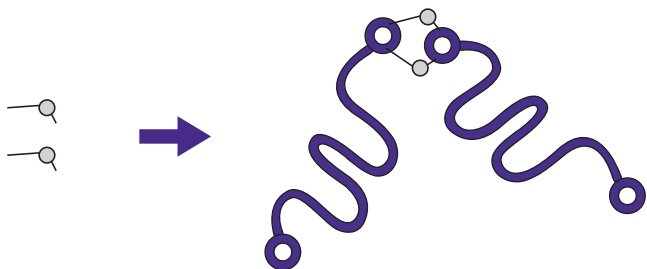

- 2 Roll out four small pieces of purple dough and form them into doughnut shapes.

- 3 Attach each doughnut shape to the ends of the two squiggle shaped strips.

- 4 Insert the long legs of LEDs into one of the doughnut shapes at the end of one strip and the shorter legs into a doughnut on the end of the other strip.

- 5 Insert the red wire into doughnut on the other end of the first strip and the black wire into the doughnut on the second strip. Turn on the battery holder to light up your circuit!
