build instructions for:

Rose

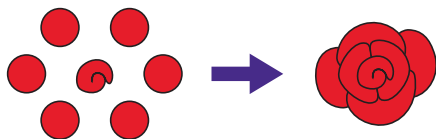

colors needed:

- 1 Begin by forming the petals by making 7 circular patties. Fold in the right side of the petal and wrap the left side around the right.

- 2 Next, wrap the other petals around the first one. Follow the pattern below for the best results.

- 3 Using the green dough, create four leaves. Mark the four leaves as shown below.

- 4 Attach two of the petals to the rose. Add the other two to the base of your fan. Using the red dough, create a ball.

- 5 Insert the black wires from battery holder and the fan into the rose. Use the red wires to connect to the red piece of dough. Turn on the battery holder and watch your fan spin!
