# squishycircuits®

colors needed:

1 Roll out two pieces of green dough and form one for the head and the other into a cone shape for the tail.

2 Roll out two more pieces of green dough and connect them together using a piece of white dough.

**3** Make five triangles with blue dough for the sea monster's spikes and then attach along the body.

4 Create the eyes using white and blue dough and attach to the head. Flatten two pieces of blue dough for the water and place the sea monster's body on top.

*Add googly eyes for a fun effect! (not included)

5 Insert the short leg of LED into one piece of green dough and the longer leg into the other.

6 Last, insert the red wire from the battery into one piece of blue water and the black wire into the other. Turn on the battery holder to light up your sea monster!
