HM HANDLER

MODEL NO. 4022

Extrication, safety, and search and rescue operations expose hands to cut and puncture hazards that require durable hand protection.

The HM® Handler gloves have a dexterous anti-slip grip with cut and puncture resistance that is double stitched onto synthetic leather with Kevlar® thread for grip control and durability. Flexible Thermoplastic Rubber (TPR) on back of fingers adds impact protection, as well as the accordion-style padding on knuckles and back of hand. The elasticized 500D Spandex long cuff secures glove around arm, keeping debris out and preventing bacterial growth.

FEATURE KEYS & BENEFITS

- 1 **Dual-Layer, One-Piece Anti-Slip Grip:** maximizes grip control and adds cut and puncture resistance to palm.
- 2 **Kevlar® Thread Double Stitched Palm:** ensures palm grip is durable and lasts a long time.
- 3 **Flexible TPR on Fingers:** adds impact protection.
- 4 **Accordion-Style Rubber:** protects the back of the hand and knuckles from light impacts, lacerations and abrasion damage.
- 5 **500D Spandex Wrist Closure:** ensures debris is kept out of glove, and reduces bacterial growth.
