

## C-15

Cold and wet conditions can be detrimental to dexterity and grip. The C-15 glove resists oil and water with 360 degrees of Nitrile coating. The addition of an insulated lining helps keep hands warm. The high visibility coating extends from the fingertips to the wrist to keep your hands dry and protected when working with wet or oily surfaces. A non-coated elasticized cuff ensures that the glove fits well while keeping debris out.

### FEATURES

- **Nitrile-coated** - Adds extended oil, chemical, and water resistance as well as high visibility
- **Insulated Lining** - Keeps hands warm in cold environments
- **Form-Fitting Material & Elasticized Cuff** - Adds breathability and ensures snug fit
- **Hand-washable** - Allows gloves to be cleaned for greater longevity

### USES

- Maintenance
- Cold Storage
- Cold Application

### TESTING & CERTIFICATION
