

HM™ IMPACT

MODEL NO. 8015

Handling tools and equipment in the mining industry can result in debris impacting the back of the hand. HM® Impact gloves come in a segmented three-layer foam and flexible Thermoplastic Rubber (TPR) construction that protects the back of hand, fingers and thumb from impacts, lacerations and abrasion, without restricting hand movement. The one-piece DNX Grip™ provides grip control and cut resistance, and is double-stitched onto synthetic leather to add durability. The adjustable wrist strap ensures a snug fit while the gloves are in use.

FEATURES

- **One-Piece DNX Grip™** - Adds grip control and cut level two protection
- **Double-Stitched Palm** - Adds durability and longevity in high-wear areas of the glove
- **Segmented Three-Layer Foam** - Adds back of hand impact protection against impacts, lacerations and abrasions
- **Flexible TPR (Thermo Plastic Rubber)** - Shields against impact injuries
- **Reflective Fingertips & Hi-Vis Color** - Provides visual identifiers in low-light and emergency situations
- **Adjustable Wrist Strap** - Ensures gloves fit snugly

USES

- Heavy Construction
- Demolition
- Jackhammer Pilot
- Riveting
- Impact & Power Tool Use
- Pit Crew
- Chainsaw Operation
- Mining
- Cycling
- Motoring
