

# HM360

MODEL NO. 3030

HM 360 gloves are born from client demand, strategically hybridizing our best core technologies. The dorsal impact protection is flared at the fingertips to provide high incidence area coverage that is continuous to the wrist. The one-piece palm offers continuous grip and traction control. It allows the wearer to have flexibility without the need for protection gaps. Curved finger seams mimic natural resting hand positions to reduce hand fatigue at the end of long shifts. HM360's interior liner marries cooling technology with a 360 cut and puncture resistant liner for comfort and protection.

## FEATURES

- **Two-Way Stretch Spandex Material** - Keeps glove breathable
- **Flexible TPR** - Continuous Impact Protection on fingers lets you work in tight spaces
- **High-Level 360 Cut Protection** - High Density Cut Resistant Layer reduces exposure from avoidable lacerations from every angle
- **ZG Palm Technology** - One-piece coverage improves grip control in dry, wet or oily conditions

## USES

- Refineries
- Mechanics
- Oil & Gas
- Warehouse
- Bricklaying
- Roofing
- Construction
- Wood Working
