

TURBINATOR®

MODEL NO. 3061

Originally designed for wind turbine maintenance technicians, the Turbinator® has been successfully used for activities on and off the job site. Cyclists love the snug fit and the high dexterity, impact reducing palm with silicon grip. Windproof and light-weight, the Turbinator® features silicone covered gel patches on the palm for strong grip and vibration absorption. Based on feedback from the wind energy industry, the Neoprene Polychloroprene back of the gloves adds wind resistance, as well as breathability and comfort.

FEATURES

- **Hexagonal Memory Gel®** - Absorbs vibrations from wind turbines and tools, while reducing effects that can cause HAVS (Hand-Arm Vibrations Syndrome) and carpal tunnel
- **Silicone Surface**- Creates an unflinching grip and dexterity
- **Neoprene Construction** - Adds breathability and ventilation, which helps keep the hand comfortable while preventing bacterial growth. Also adds wind, water and sun resistance to help with durability
- **Adjustable Elastic Cuff**- Ensures a snug fit

USES

- Wind Turbine
- Maintenance
- Mechanic
- Power Tool Operation
- Chainsaw Operation
