

TOW GRIP® 201

MODEL NO. 3131

Gripping power is crucial when working with multiple textures and slick surfaces in oil and gas production, which is why the Tow Grip® 201 has a reinforced oil-resistant grip. The Tow Grip® 201 features a non-slip grip on top of a cotton palm with reinforced Kevlar® thread double stitching. Flexible shields add impact resistance for the fingertips, thumb, knuckles and metacarpals on top of the form-fitting material.

FEATURES

- **Pre-Curved Fingers** - Molded to fit the natural curve of your fingers at rest to fight against hand fatigue
- **Oil-Resistant, Dual-Layer Palm**- Adds oil and water resistance
- **Flexible TPR (Thermo Plastic Rubber)** - Shields against impact injuries
- **Zip-Grip** - Durable grip in oil
- **Form-Fitting Material** - Ensures breathability and comfort

USES

- Search & Rescue
- Barrel & Drum Handling
- Bat Chain Pulling
- Gas & Oil Drilling
- Heavy Construction
- Tool Pushing
- Fracking
- Rigging
- Mining
- Extraction
