

MICROSABLE®

LINER

TEMP SERIES

MODEL NO. 5008

FEATURES KEYS & BENEFITS

MicroSable® Interior Lining: Adds insulation to keep hand warm and resists piling for longevity and hand comfort.

External Seams: Ensures a comfortable seamless internal feel.

Microbial Design: MicroSable® is a microbial material, which prevents bacteria growth and in turn diminishes smell.

Waterproof Membrane: Ensures lining is resistant to oil, water and other liquids to keep hand dry.

Long-Cuff Design: Makes lining easy to put on and take off, while giving hand the ability to pull out of glove if needed.

Curved-Finger Design: Matches natural contour of hand for less hand strain, preventing fatigue injuries.

Since hard-working hands don't stop laboring when cold weather hits, Cestus® has created the MicroSable® Liner to extend the life of gloves already in-use to winter months or cold-weather environments.

The MicroSable® Liner is an oil-and-water resistant, insulated liner that allows you to get year-round use out of your gloves. Featuring a water-resistant outer layer and faux-fur interior lining, the MicroSable® Liner design was inspired from Silver Fox fur and will keep your hands warm and dry throughout winter months, or cold weather — while letting you continue to use the gloves you've been using.
