

TURBINATOR®

WINTER

MODEL NO. 5061

The Turbinator® Winter is an insulated glove that features a silicone grip, which maximizes grip control with vibration absorbing gel. The durable Neoprene glove construction adds resistance to wind, UV, and cold weather, while being able to flex with hand movement. The insulated interior lining keeps hands warm and dry during operations.

FEATURES

- **Hexagonal Memory Gel®** - Absorbs vibrations from wind turbines and other tools, while reducing the effects that can cause HAVS (Hand-Arm Vibration Syndrome) and carpal tunnel
- **Silicone Surface** - Creates an unfailing grip on the palm and adds dexterity
- **Neoprene Construction** - Adds ventilation to keep the hands comfortable, while preventing bacterial growth. Also adds wind, water, and sun resistance to improve durability
- **Adjustable Elastic Cuff** - Ensures a snug fit while in use

USES

- Snow Plow Operation
- Wind Energy
- Mining
- Courier
- Pit Crew
- Motorcyclists
