

TrembleX®-5

MODEL NO. 2021
DESIGN PATENTED

The TrembleX®-5 is a fingerless glove that has silicone covered memory gel palm that reduce vibration from tools. The fingerless design allows the user access to finger tips, which aids in picking up small items like screws and nails. Knuckle padding adds light impact, abrasion and laceration protection. Form-fitting material and the adjustable wrist strap ensure the glove fits snugly, while still being breathable.

FEATURES

- **Fingerless Design** - Allows for full dexterity and ventilation through access to finger and thumb
- **Hexagonal Memory Gel®** - Reduces vibrations from tools and equipment that cause Hand-Arm Vibration Syndrome (HAVS) and Carpal Tunnel
