

TREMBLEX 5®

VIBRATION SERIES

MODEL NO. 2021

FEATURES KEYS & BENEFITS

Fingerless Design: Allows for full dexterity and ventilation through access to fingers and thumb.

Hexagonal Memory Gel®: Adds vibration absorption from tools and equipment, and reduces vibrations that cause Hand-Arm Vibration Syndrome (HAVS) and Carpal Tunnel.

Silicone Surface: Creates a strong grip on palm.

Form-Fitting Material: Adds breathability and helps glove fit snugly.

Adjustable Wrist Strap: Ensures the glove fits snugly while in use.

Terry Cloth Back on Thumb: Absorbs sweat from brow or hand, and adds breathability.

Using tools and equipment on job sites that require the full dexterity of your fingers calls for a fingerless glove with grip control and vibration absorption.

The TrembleX® -5 is a fingerless glove that has silicone covered Hexagonal Memory Gel® on areas of the palm that come into contact with tools and equipment to maximize grip and reduce vibrations. The fingerless design allows the user access to finger tips, which aids in picking up small items like screws and nails. Knuckle padding adds light impact, abrasion and laceration protection on the back of the glove. Form-fitting material and the adjustable wrist strap ensure the glove fits snugly, while still being breathable.

- HEAVY CONSTRUCTION • DEMOLITION • JACKHAMMER PILOTS
- RIVETING • IMPACT & POWER TOOL USERS • PIT CREW
