

WELDTECH PRO

WELDER SERIES

MODEL NO. 7037

FEATURES KEYS & BENEFITS

Premium Goat Leather: Soft, yet more durable than other leathers.

Extended Long-Cuff Design: Ensures sparks and debris stay out of glove.

High Density Cut Resistant Base Layer: Maximizes wearer protection from avoidable lacerations.

Flexible TPR: Targeted Impact Protection on fingers let you work in tight spaces while protecting against caught between injuries.

Reinforced Ropeline: For increased abrasion and laceration protection

Welders often use multiple tools in addition to their welding equipment, and need multipurpose gloves that they won't have to take off while switching tasks.

The WeldTech Pro is designed for a variety of tasks, and feature reliable cowhide leather outer with added protection to cuff where ambient heat is transferred. Premium one-piece, Goat-Skin leather palm gives the WeldTech Pro superior durability and tactility. Dual-layered ropeline adds abrasion protection to a high wear area. Segmented Thermoplastic Rubber (TPR) on back of fingers, thumb and knuckles provide impact protection. Reflective striping on back of hand is added for better spatial awareness in low light conditions. Extended long-cuff design ensures sparks and debris stay out of the glove.

• WELDERS • METAL FABRICATOR • HEAVY CONSTRUCTION
• FIRE PROOFING • TORCH CUTTING • SPUD WRENCH USE
