5000SERIES

INDUSTRY-STANDARD 5000 SERIES HARDWARE HAS EVEN MORE TO OFFER. Specifically, two new 5500XF Extended Footboard hi-hat stands in two and three-leg models to match our latest 5000XF bass drum pedals. We've also introduced a handy new single tom/cymbal stand that's the perfect choice for 'over-the-bass drum' set-ups.

FACTORY
ACCESSORIES

TWO NEW FACTORY ACCESSORIES TO OUTFIT ANY KIT.

Utilizing our popular bass drum hoop clamp, this adjustable cymbal holder is great for small cymbals, effects, and stacks. Tailor-made for single rack tom set-ups, it allows for additional percussion items to be placed tightly around the snare to help provide a new creative flow.

For the tech-savvy drummer, we offer a purpose-driven smart phone/headphone holder that's compact enough to fit anywhere around the kit. It brings streaming content, play-along tracks, and more within easy reach. As a bonus, it is also designed to hold a set of headphones or in-ear monitors.

COLLECTORS SERIES
333 DRUMS

VLT IS NOW 333.

Our popular Vertical Low Timbre shell technology has just been improved. This 9-ply shell can be custom-ordered in a variety of wood species and delivers attack, sustain, and maximum low-end response.

DESIGN SERIES DRUMS
IN STEEL GRAY LACQUER + ADD-ONS

POPULAR DESIGN SERIES™ SHELL PACKS ARE A STEEL.

Our most accessible all-maple kit is now available in a sleek Steel Gray Lacquer finish. Modern and lustrous, the new shade of gray suits a variety of musical genres and playing situations.

INTRODUCING A COMPLETELY NEW COLLECTION OF COLLECTOR'S SERIES® PRIVATE RESERVE EXOTICS™.

John Good's wood hunts proved fruitful in 2019. So much so that he returned with a curated selection of highly-figured exotics that are nothing short of spectacular. Choose from Tortoise Shell Sapele Pommele, Moabi, Candy Stripe Padauk, Super Curl Maple, or Monkey Pod. All of these woods can be ordered in combination with any California Custom Shop shell configuration. They are all in limited supply.

DW MFG ENGINEERS A MACHINED MASTERPIECE.

Developed to epitomize the definitive cast bronze snare drum, this ultra-limited edition collector's piece has been outfitted with every conceivable detail. From a newly-designed Mini MAG Throw-Off to machined brass turret lugs, nothing has been overlooked. Designed in conjunction with DW artist, and avid drum collector, Dave Elitch, it represents the culmination of nearly two years of testing, prototyping, and a lifetime of passion. Only 75 of these drums will be produced.

PRESENTING A VARIETY OF COLLECTOR'S SERIES® SNARE DRUMS TO SUIT A WIDE RANGE OF TASTES.

This year's snare drum offerings are as varied as they are compelling. First on the list is a drum comprised of "Space Carbon Fiber". These loud and articulate shells are fabricated using upcycled material from actual spacecraft builds.

This drum is also offered in our new Pi depth of 3.14". It is surprisingly loud and possesses a wider-than-expected tuning range. This depth is also available in any California Custom Shop shell configuration and finish.

And last, but certainly not least, we present two meticulously-crafted wood-inlaid drums. Both designed by John Good, the aptly-named Timekeeper and Jim Keltner Icon snare drums feature dyed exotic woods that have been laser-cut, then hand-inlaid to create truly unique works of art.
