

RING SIZERS TO CUT

Prior to printing, ensure that Page Scaling is set to "100%" on your print dialog box. (To open the print dialog box, press CTRL +P)

Measure the bar below. It must be exactly 30 mm long.

This ring sizer guide only serves as a referencing tool, for the most accurate result, you will need to visit a Specialist Store.

IMPORTANT!!!

For a more effective cut, it may be better to use an Xacto Knife, Craft Knife or Small Box Cutter Knife to carefully make a slit on the dotted lines of the ring sizer where it says "Cut Here". It is important that you do not slit beyond the guides where the dotted lines stop, as you will not be able form the sizer around your finger.
