	220-250 grains	220-220 grains	200-240 grains	5', 7.5', 10'	5', 7.5', 10'	Airflo Euro Nymph

\*OPST line recommendations for 3Wt. Rods.

The versatility of this rod will amaze as it can be fished as a traditional 9' 4 piece 3 weight, add a 1' section to make it a 10' rod, a 27 inch section to make it an 11' 3 inch rod, or add both conversion sections for a length of 12' 3 inches. So from traditional 3 weight lines to the tight line nymphing techniques including French, Czech and Polish styles, you'll make the "leader only" tuck casts with accuracy and ease – at any rod length. Finally, we included a 3 inch lower cork grip that replaces the weighted fighting butt – perfect for the new micro spey lines and techniques... just pick the optimal length for the environment and application.
