Permit needed

### Notes:

- This pricelist is for an installed simple rectangular shelter, to a ground floor deck or patio, preferably directly connected to a house, but if that is not practical, then our shelters can easily and elegantly be attached via brackets
- The prices above assume there is good site access, and the powdercoat colour is Matt Ironsand, Titania, or GreyFriars.
- More than 100 other custom colours are available - add \$500.
- LED lights are \$50 each, including fitting to the rafters. (An electrician will need to fit the provided transformer)
- Many agents can fit curtains as well - please enquire.
- A permit (building consent) is needed over 20m<sup>2</sup>, but ask about our clever "adjacent shelter" option!
- Our system is modular so you may add modules together - so a 5.075 to a 4.075 will create a 9.150m. wide roof!

In some NZ locations we need new Agents - but you must really impress us in a number of key areas!

Kermit

DIY shelter-in-a-box

3x3m

\$3,450, or \$3,950 with 10 LEDs.
