

EMBROIDERY TEMPLATE

KATM SEWING MACHINE

Use the dotted line as a template for the Water Soluble Stabiliser.

STEP 1:

Trace the template onto the Water Soluble Stabiliser.

STEP 2:

Pull your chosen fabric taught with the embroidery hoop.
Attach the traced template to the fabric you are embroidering onto.

STEP 3:

Choose your preferred stitch method. For this template, our recommendation is 'satin' stitch.

STEP 4:

Choose your colours and start your embroidery project. Complete each colour section one at a time. We recommend you start with the colour most used and go from there.

STEP 5:

Once finished, place the embroidered project into water so as to dissolve the embroidery stabiliser. It gets a bit gloopy at first, but will dissolve fully. Set out to dry.

You're all done!
