

# ReverseForce Air Gun

Harnessing the power of compressed air, the **ReverseForce Air Gun** effectively extracts metal chips and debris from **deep inside** axle housings, machine cavities, or gear boxes.

Standard air guns with conventional nozzles can drive metal chips and debris deep into sensitive mechanical equipment, causing failure and future maintenance problems. In contrast, the unique **ReverseForce** directs compressed air back towards the opening thereby expelling chips and debris from the interior.

## Key Benefits

- Faster than conventional cleaning methods
- Extracts rather than drives chips and debris further into interior of machinery
- Runs on standard shop compressed air
- Light-weight, easy to handle

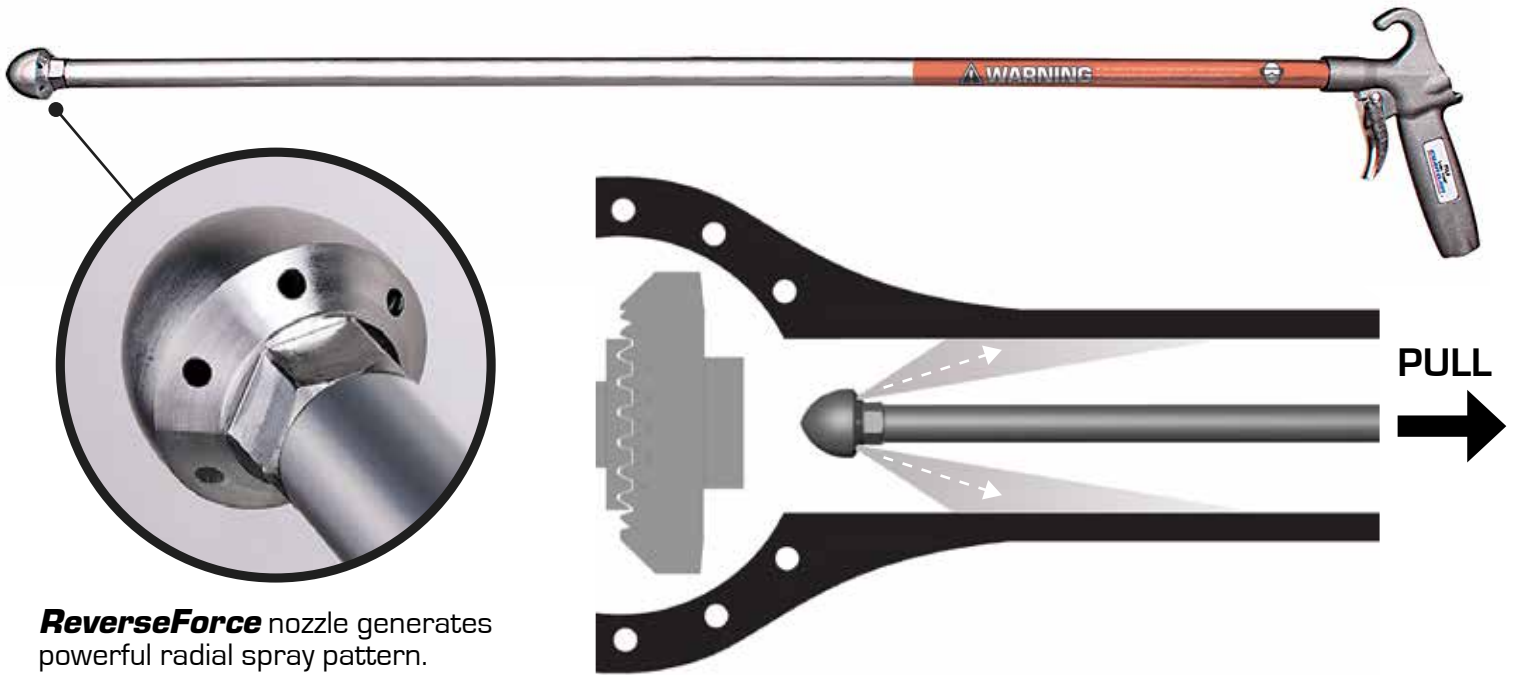

Broken axle with metal chips extracted from axle housing by the **ReverseForce Air Gun**.

# Meet the *ReverseForce* Air Gun!

**ReverseForce** nozzle generates powerful radial spray pattern.

To clean the cavity, insert the **ReverseForce**, actuate the trigger, and pull the tool back towards the opening.

## Features

- Durable, cast aluminum handle with hanging hook
- Wide, comfort trigger
- Rugged, 48" aluminum extension
- Powerful, **ReverseForce** nozzle
- 1/4" FNPT inlet

## Specifications

- Air Usage: 37 cfm @ 100 psi
- Noise Level: 93 dBA
- Weight: 1.5 lbs
- Dimensions: 52 1/8" x 1 3/8" x 6 1/2"

## Clean out equipment such as:

Machine Cavities

Gear Boxes

Hydraulic Cylinders
