Luxura Jewel.

Are you ready for THE tanning revolution that gives you 50% energy-savings and 100% tanning power? Yes! Less really is more, thanks to ground-breaking technical innovations and a unique combination of UV-A and UV-B LED technology. The Luxura Jewel is the latest model at the top of Luxura's range and it excels in every aspect. New technology and ground-breaking innovative developments create a spectacular tanning experience with excellent tanning results. Made to shine, just like a great jewel.

Full LED facial tanner

This facial tanner was made to shine! Designed specially for huge improvements in performance, featuring UV-A PowerLEDs, UV-B PowerLEDs, red LEDs and yellow LED light. The Jewel's full LED facial tanner offers powerful LEDs on an innovative spectrum, giving it high direct tanning power, while saving big on energy consumption.

Perfect light diffusing reflectors

The true pièce de resistance of the Jewel are the toric and facetted reflector cups, a smart innovation inspired by the facetted surface of jewels. Toric and facetted reflectors break light rays and infinitely diffuse them, creating an even spreading of the light across face, neck and chest for optimum tanning results.

Full LED facial tanner

UV-A PowerLEDs – tan boosting

176 UV-A PowerLEDs with toric reflectors guarantee high direct pigmentation and an immediate visible, gorgeous tan.

UV-B PowerLEDs – vitamin D building

16 UV-B PowerLEDs with faceted reflectors ensure a lovely base tan and effectively build up your vitamin D.
Revitalising yellow LED light

Careful positioned LED tracks of 672 yellow micro LEDs provide you with a full energy boost.

Collagen boosting red LEDs

68 red light LEDs with toric reflectors nourish the skin, stimulating the production of collagen and elastin. It offers a soothing sensation leaving the skin soft, supple and intensely tanned.

Tan like a boss,
with the BOS Tanning Booster

The Jewel offers unprecedented fast tanning, thanks to
its BOS Tanning Boosters: unique tanning boosters with
high direct pigmentation value, evenly distributed across
the canopy and bed. Each bed is equipped with 10 BOS
Tanning boosters, which each consist of 25 UV-A PowerLEDs
and 25 red LEDs with toric reflectors.

State-of-the-art lamps

A new type of premium lamp works in perfect sync with
the BOS Tanning boosters. Together they achieve the most
effective and optimum combination of UV-A and UV-B within
the permitted regulations.

An individual tailored combination of phosphorous mix gives
the amazing deep blue lamps their superior tanning power,
resulting in an immediate visible gorgeous tan.

A *jewel* makes you look great.

Full LED shoulder tanner

Perfect tanning of those parts of the body notoriously hard to reach, such as the neck and shoulders, is now within reach!

UV-A & UV-B PowerLEDs with toric and faceted reflectors

Shouldertanner extension

The integrated shoulder tanners are equipped with 16 UV-A PowerLEDs, 2 UV-B PowerLEDs and 8 red LEDs, with toric and faceted reflectors.

Schoulder-necktanner bench

10 UV-A PowerLEDs and 5 red LEDs with toric reflectors, and a uniquely shaped reflector guarantee the perfect tanning result.

50% energy savings, 100% tanning power

Sometimes, you can have it all! Premium tanning results AND saving big time on energy, thanks to the latest innovations added to the Jewel.
The Jewel offers a ground-breaking energy save of up to 50% compared to the Vegaz! New and innovative technologies keep the energy consumption consistently low, thanks to more efficient stand-by mode, a full-LED facial tanner, our newly developed Premium lamps, smart warming and cooling and improved end-of-lifespan lamp performance.
Ground breaking 50% energy save

You're in control

Intelligent IP Control software monitors the lamps' energy consumption and keeps their output on an even keel throughout their lifespan. Each lamp can be controlled individually, so as to provide those lamps further away from the body with more power to compensate for this distance.

IP Control on the Jewel has been made compatible with LEDs as well. So that you are in full control of ALL of the light!

Unique calculation software allows us to simulate and calculate the full UV exposure over the entire body, which helps determine the optimum conditions for each LED and lamp, ensuring even tanning across the entire body.

Temperature control

With its smart and silent cooling system, the Jewel achieves a comfortable temperature in a flash. You can adjust the temperature to the ideal level, and heat or cool accordingly with climate control.

SoundAround

The sublime surround sound music system, offers relaxation through music in high quality. The Jewel also offers an internet radio option to stream favourite radio stations via MyLuxura.

Sense wellness features

Looking for some refreshment? The revamped Qsens feature offers a naturally fresh mist and the improved Xsens feature contains a delicious scent which is diffused by means of a sachet filled with intensely scented wood chips.
MyLuxura

Feeling in control also makes you feel good. And with myLuxura you can be in control of your Luxura tanning beds, to ensure maximum capacity and cost efficiency. The maintenance and service portal in the cloud keeps all your data safely in one place. You can control your tanning beds remotely and gain insight into their maintenance status, plan maintenance, reset tanning beds which are malfunctioning, run software updates and solve errors. This way, you can maximise the performance of your tanning beds. Easy does it!

Color your world

Illuminate the room with a gorgeous set of constant color shades or choose a color loop for beautiful color effects that flow into each other.

A jewel in every facet.
