V<sub>8</sub> Crystal White

# we like it colourful

The Luxura V<sub>8</sub> has a dazzling design that illuminates from the beautiful top to bottom. The smooth, high quality finishing –with no visible fastening materials emphasizes its stylish appearance.

The Luxura V<sub>8</sub> includes the special Ambient FlowLight that brightens up the room with an inviting carousel of light, with one colour seamlessly flowing into the next. Alternatively, you can select a single colour tint so the V<sub>8</sub> perfectly matches the cabin, salon or mood. Ambient FlowLight accents the elegant design thanks to the V-shape of the doors and the accent lines along the bottom of the doors. Moreover, through use of a light element beneath the unit, it provides a visual 'floating' effect. Inside the cabin the Ambient FlowLight Panel creates a relaxing atmosphere between and during the tanning sessions.

The Luxura V<sub>8</sub> has two space saving doors which can be opened light and effortlessly. At the inside the comfortable non-skid floor ensures a secure stand.

For those who find it uncomfortable to enjoy a tanning session with closed doors: the clever design of the V<sub>8</sub> makes it possible to leave the doors a chink, half or even completely open while tanning.

## easy maintenance

Maintenance and service can be carried out easily.

By removing the Ambient FlowLight panel inside the V<sub>8</sub> you have access to all electronic components.

**1]** On the outside, dust filters are cleaned and replaced quickly. In addition, **2]** the Qsens jerrycan and **3]** Xsens cartridge\* are placed outside the vertical tanning bed in a secured unit for quick replacement.

The acrylics are simple to remove as well, thanks to the unique aluminium click system for easy maintenance like cleaning acrylics or replacing tubes.

\*Xsens en Qsens are optional features

# we like clever solutions

An additional clever option on this vertical tanning bed is the changing room. Attached to the V<sub>8</sub> it instantly creates a solid stand alone tanning unit just about everywhere!

Wellness tanning for all the senses. Whenever a pleasant atmosphere in the tanning tunnel is desired, Xsens will distribute a wonderful scent throughout the interior of the Luxura. It's like a breath of fresh air in the fragrances Ocean, Blossom or Sandalwood. Choose between Xsens I (one fragrance for your Luxura) and Xsens III (three fragrances).

Naturally refreshing. A wonderful, gentle mist is sprayed across the body at intervals.

Sound Around Plus\* includes SD cards providing two extra internal music channels (relax music, energetic music or program your own music).

\*SoundAround Plus for V<sub>10</sub> is excluding Bluetooth.

In addition to the four optional music channels from the SoundAround package, the user may plug in his own MP3 player, in order to enjoy his own favourite sounds.

A friendly voice will guide the user acoustically through the different functions. It will describe all possibilities, turning the tanning session into a veritable miniature holiday.

This positioning extra ensures an optimum tanning performance, because it will locate small and medium-sized users correctly to the tubes. Therefore, both the face and the feet will be perfectly positioned during the tanning session (for V<sub>10</sub> only).

High Power System: a special filter for the SLi facial tanner. For more efficiency, direct pigmentation, and a visual mirror effect.

The smart Bluetooth system allows tanners to easily connect their own smartphone or small tablet to the sound system for great audio experiences. This way they can instantly play their own music while tanning. No cables needed - simply play & tan.

The XL tubes, which have a length of two metres, ensure an even, all-over tan.

The fading colour flow with a nearly inexhaustible range of colours provides an extra sense of atmosphere.

The electronic ballasts - integrated as standard - ensure energy savings of at least 15% (for V<sub>6</sub> 44, V<sub>6</sub> 48 and V<sub>8</sub> only).

This Intelligent Power Control System guarantees, during the entire lifecycle of the tubes, an optimal output of 0,3 W/m<sup>2</sup> in conformance with the EU regulation. IP Control achieves a tube lifecycle of 1500 hours! Energy consumption of the tubes will reduce up to 25% (for V<sub>10</sub> only).
