Give your TV an edge and reduce eye strain with the MTB04 LED TV Backlight Kit from Monster Mounts.

The MTB04 is an LED backlight kit that attaches to the back of your TV. The MTB04 works with both freestanding and mounted TVs and can be plugged into the back of your TV directly via a USB port. This allows for the lights to be turned on and off with your TV. The MTB04 has 16 color options and 4 dynamic themes, allowing you to express yourself, all while helping reduce eye strain when in dimly lit rooms or low level lighting situations. The included 4 strips attach to all sides of your TV for even light distribution.

The MTB04 also includes an easy to understand user manual and comes backed by a manufacturer's limited lifetime warranty.
