When the Fontana family produced the first-ever indirect combustion, metal, wood-fired oven in Italy during 1978, it was a true first. There was nothing else like it available. Today Fontana Forni is widely recognized as a leading manufacturer in portable metal ovens. We now offer a wide range of ovens for commercial and residential use. Fontana ovens are still 100% made in Italy by master craftsmen with painstaking attention to detail. Simply put, these are the highest quality, most durable ovens on the market.

Like their wood-burning counterparts, the Margherita Gas & Mangiafuoco Gas pizza ovens were designed from the ground up to cook perfect, Neapolitan-style pizza while offering the convenience of gas. These gas units can be fueled using propane or natural gas (with a conversion kit). Both ovens are Intertek-ETL certified in the United States and Canada. And because they bear the Fontana name, you can feel confident that these ovens will be easy to set up, easy to maintain and will perform flawlessly for years.

Fontana Forni is proud to announce two new models for commercial use. These are the perfect pre-built solution for restaurants that are looking to offer a true wood-fired pizza experience to their customers. Either oven makes a great cost effective alternative to more expensive built-in ceramic ovens for a restaurant or catering application.

The Vulcano & Prometeo each utilize solid-weld construction using 310 S Stainless Steel, the type of stainless usually reserved for forging and smelting applications. 310 S Stainless Steel provides solid corrosion resistance, excellent resistance to oxidation, and superior strength in temperatures up to 2,100°F. With these models, you can cook with confidence knowing that the oven will perform under the rigors of daily restaurant use for many years to come.

Both models are available with or without the cart for standalone or countertop operation.

Why Choose Fontana Forni?

OUR EXPERIENCE
In 1978 the Fontana family designed and produced the first-ever indirect combustion wood-fired oven. 40 years later, Fontana ovens are still 100% made in Italy by master craftsmen. Simply put, these are the highest quality ovens on the market.

HIGH QUALITY MATERIALS
From day one, Fontana ovens have been built to exacting standards using: 2.5mm of high performance stainless steel, 12cm of all-natural rock-spun insulation materials and corrosion-resistant, powder-coated metal. Many other brands use lighter, cheaper materials, lower-grade steel, and synthetic insulation, affecting heat retention and durability.

BUILT TO LAST
Fontana Forni uses all continuous solid-weld construction — never spot welding and screws like you’ll find in many other ovens, which will peel, split, or break under the pressures of these ovens’ high heat. That’s why, we are proud to say, many of the original Fontana wood-fired ovens are still in use today.

INNOVATIVE DESIGN
Fontana ovens use a traditional vault shape (vaulted from front-to-back, as well as from side-to-side), proprietary exhaust system, three-surface refraction and innovative “total-fire” structure to produce uniform heat distribution.

QUICK HEAT UP TIME
Fontana ovens are unique in their ability to achieve brick-oven temperatures in a short amount of time. Our single-chambered ovens heat up in as little as 30 minutes (45 minutes for our dual-chambered ovens), compared to the two-to-three-hour heat-up time required for traditional brick ovens.

PORTABILITY
A permanent brick oven in your backyard is great, but they can be very expensive to build and they can’t be relocated if your family moves into a new home. A portable oven from Fontana offers the same great cooking experience of a built-in brick oven, but it can easily be relocated.
At Fontana Forni, we offer a robust line of accessories for making pizza, bread, & cooking. We also offer cutlery and implements for cleaning, care, and maintenance. We strongly urge our customers to consider an accessory kit to go with their oven.

Accessories

The **Total Deluxe Accessory Kit** includes: the brass-bristled brush, turning peel, pizza peel, ash shovel, infrared thermometer, electric fire starter, 5 piece dough tray set, dough cutter, scraper, & pizza wheel.

The **Gas Fired Oven Accessory Kit** includes: the brass-bristled brush, turning peel, pizza peel, & infrared thermometer.

The **Wood Fired Oven Accessory Kit** includes: the brass-bristled brush, turning peel, pizza peel, infrared thermometer, & ash shovel.

The Pizza e Cucina is one of the most innovative products in our entire product line; a modular all-in-one, backyard cooking solution. The left side of the Pizza e Cucina can be used as a pizza oven, cast-iron grill, or a smoker. While baking pizza or grilling, you can use the right side of the unit as either a flattop griddle or a wok. The unit easily transforms between these all of these functions with its included accessories. And because we make every Pizza e Cucina with the same commitment to quality craftsmanship as our other Fontana products, you can rest assured that your multi-function oven will deliver superior results for years to come.

If you want the Fontana dual-chamber design, but value permanence over portability, then you’ll love the INC built-in wood-burning oven. As the centerpiece of your patio or backyard kitchen, the INC will wow your dinner guests with its beauty and the bounty of culinary delights. From brick-oven pizza and bread to roasted meats and vegetables, you can prepare in its wood-fired cooking chamber.

The INC V has tapered top corners while the INC Q has 90 degree top corners for a slight variation aesthetically. A full range of sizes allows you to find the perfect fit for your cooking needs and style.

- Heavy-Duty 2.5 mm 304 & 441 Stainless Steel.
- Cast-Iron Doors.
- 12cm Natural Rock-Spun Insulation.
- Uses 5x Less Wood than Traditional Brick Ovens.
- Heats Up in 45 minutes.
