

# Make your own telescope

You will need:

Black paper  
Glitter tape  
Stars

You will also need:

Kitchen or toilet  
roll tube  
Sellotape

How to make:

- 1** Unfold your black paper and wrap around your toilet or kitchen roll and tape along the seam with Sellotape.
- 2** Decorate your telescope with tape and stars.
- 3** When it's dark go outside and see if you can see any stars. It's best to do this on a clear night when there aren't too many clouds in front of the stars.

**Top Tip** - from Charlotte (chief tester aged 6) - You need to close the eye you are not looking through the telescope with, but if you find this tricky, just use your free hand to cover your eye!
