

ARKO FURNITURE

Arko Furniture designs and manufactures high quality items suitable for outdoor and commercial environments.

Every Arko product has been manufactured and assembled in Australia from a range of metals including mild steel and aluminum. Outdoor products are zinc plated and powder coated to protect them from the elements.

Powder Coat

Powder coat is a decorative finish only and provides no protection from corrosion.

The components of Arko Furniture's powder coated products will be treated with single stage or two-stage chemical protection. This process guards against corrosion and is provided for outdoor specified products.

Minor corrosion on edges, undersides and surfaces do not affect the structural integrity of the product and are not covered by warranty.

Whilst every effort is made to produce the most suitable finish in accordance with the end use and environment the product will be subjected to, Arko Furniture cannot guarantee the decorative finish (powder coat) against scratching, chipping, fading or surface corrosion or defects caused by harsh coastal exposure.

Product Care

The frequency of ongoing maintenance will depend on the environment your Arko Furniture product is in. Commercial and Industrial environments require regular rinsing and drying of the finish. Please be aware that coastal sea air may deteriorate the finish.

Avoid abrasive cleaners scratching the surface and never use strong solvents on powder coated surfaces. Do not allow bird droppings to build and dry out

Minor surface corrosion does not affect the structural integrity of the product and is not covered by the warranty. Rough treatment of furniture can result in damage which is not covered under warranty

WARRANTY

All Arko Furniture products come with a 5 year structural warranty from the date of purchase against defects.

This warranty is deemed void if repairs or alterations are carried out without prior consultation and written agreement from Arko Furniture.
