

## PROFILE PLANTER.

Our Profile Planter wall offers a modern solution for incorporating vertical greenery into offices and commercial environments where a higher level of screening is required.

The fine lined frame of the Profile Planter is available in textured black or white powder coat and combined with laminated MDF planter boxes made in any Polytec Woodmatt timber grain or solid colour.

Careful consideration to indoor plant maintenance has guided the design of the Profile Planterwall. Each planter box has a removable mulch plate that houses four 200mm sealed flower buckets suitable to most industry standard sub-irrigation systems.
