

Additional charges may occur if:

- Your variant exceeds 10% of the base recipe
- You have more than 10 ingredients in the base recipe or more than 5 in each variant
- You have additional exposures

Additional Exposures:

Each separate area of exposure requires specific calculations. Because of this, an additional charge of £30 +VAT for each area will incur. It's important that you let us know when you are planning to market a product for specific areas, as the assessment will not be valid if all areas are not considered. This also applies for products intended for use on babies, infants or during pregnancy or breastfeeding (if specifically marketed for this use), or for products with multiple uses, such as a Bath & Body Oil.

Examples of areas of exposure:

- Hands / Feet
- Face
- Full Body
- Scalp / Hair
- Intimate area
- Eye area
- Cuticles
- Beard (Not the same as Hair)
- Lips
- Pulse Points

Perfumes and Body Sprays:

An additional charge of £30 +VAT applies (additional exposure for inhalation).
