Product Abstract: Copaiba Balsam Resin is extracted from trees growing in the wild. They are found mainly in the South American rain forests, particularly in Brazil, Columbia, Peru and Venezuela. The resin is harvested by tapping or drilling holes into the trunk of the tree, much like how rubber trees are tapped. Although this resin is often referred to as balsam, it is not a true balsam. Copaiba Balsam Essential Oil has been used historically as a fixative in perfumes and colognes.

Because Copaiba Balsam Essential Oil contains over 90% sesquiterpenes, the oil is said to be a powerful anti-inflammatory and may also exhibit anti-bacterial and antimicrobial properties.

Emotionally and spiritually, Copaiba Balsam Essential is calming, balancing and grounding.

Copaiba essential oil contains healing properties that may help ease inflammation, sore muscles, joint pain and more.

Promotes clear, smooth skin and reduces the appearance of blemishes

Common Uses: Bronchitis, sore throats, tonsillitis, varicose conditions, varicose veins, hemorrhoids, urinary tract infections, cystitis, intestinal cramps and spasms, stomachache, stomach discomfort, *Helicobacter pylori*, muscular pain, bacterial and inflammatory skin conditions, fungal skin infections, onychomycosis, foot candida nail infections, athlete's foot (from *The Complete Book of Essential Oils and Aromatherapy* by Valerie Ann Wormwood).
