

TRIONFI DELLA LUNA  
**BEAST PACK**

PATRICK VALENZA  
**DEVIANT MOON INC**

*This exclusive collection of rare cards depicts the creatures documented on the Trobian Expedition of 1789.*

The creation of this little pack is based on early European animal tarots of the 19th century, particularly the decks issued in Belgium during that time.

Each creature in our deck has its own personality traits, which you can blend into any tarot reading for greater situational clarity.
